EXPERIENCE

Plaud AI, Singapore. Full Time, AI Agent Engineer — Feb 2026 - Present

AI Work Agent(for AI Earphone)

- Contribute to Agent Harness services, including master agent, worker agent, sandbox, chat history and context, scheduled task, skill/cli/tool use.
- Contribute to Agent Evaluations, guiding Prompt evolution, and Model selection.
- Own Token Usage, cost observation and optimization module.
- Explore the feasibility of agent self-improvement.

Shopee, Singapore. Full Time, Senior Software Engineer — Aug 2021 - Feb 2026

2023 Value Star Award

AI Agent

- Initiated and built AI Code Review Agent **from 0 to 1**. Leading 3 developers in development.
- Empowered **1000+ developers** from **30+ tech teams** across Shopee and Monee.
- Optimized Performance via Prompt Engineering and a Data Flywheel Approach.

Order Settlement, Order Fee, Seller Wallet

- Designed and implemented the Korean Seller Wallet from scratch, serving 10k sellers.
- In charge of Settlement services, creating billions of billing items for order across 11 regions.
- Initiated performance enhancements, improved file processing by 90% and reducing time by 70%, etc.

EDUCATION

National University of Singapore — *Master's Degree*, Computer Science

Wuhan University — *Outstanding Graduate*, *Bachelor's Degree*, Information Security

KNOWLEDGE

My 200+ blogs in doc.fenglyulin.com

- *(AI Agents)*: Agent Loop; Harness/Context/Prompt Engineering; Dataset and Evaluation; Fine-tuning
- *(AI Coding)*: Spec-driven Development; AI Code Review; AI Native Development;
- *(AI & LLM)*: ML; DL; RL; LLM Inference System
- *(Distributed System)*: CAP, Serializability, Consensus, SMR, Distributed Transaction, etc
- *(Software Engineering)*: System Design, Go, Python, RDB, NoSQL, MQ, Microservice, etc
- *(CS Basic)*: Computer Networks, Data Structures and Algorithms, Operating Systems, Database, etc

SIDE PROJECTS

- *sgpass.info SGPR Application Data, **full-stack web product**, July 2024 to Jan 2025*
- *Twitter View History Plugin* link
